

## Postdoctoral Position in Planetary Atmospheres and Climates

The Department of Geology and Geophysics at Yale University invites applications for a postdoctoral position in the area of planetary climates. The successful candidate will join the research group of Prof. Juan Lora to explore various aspects of Solar System atmospheres. Potential projects include investigations of the hydrologic cycles of Earth and Titan, modeling of gas giant atmospheric dynamics, and surface–atmosphere interactions on terrestrial bodies. The work will involve interdisciplinary approaches, and interaction with other experts within the Department and across the University will be highly encouraged.

A PhD in Planetary Science, Atmospheric Sciences, Physics or a related discipline is required. Experience with numerical modeling and/or strong programming skills are essential. The position will be awarded for one year, with possible extension for a second year contingent on satisfactory performance.

Applicants should provide a single pdf document including a CV with publication list, a brief statement of research interests, and contact information for three references, to Prof. Lora ([juan.lora@yale.edu](mailto:juan.lora@yale.edu)). Applications will be reviewed starting May 15, 2019, but the position will remain open until filled. Shortlisted candidates will be contacted.

Yale University is an Affirmation Action/Equal Opportunity employer. Yale values diversity among its students, staff, and faculty and strongly welcomes applications from women, persons with disabilities, protected veterans, and underrepresented minorities.

Informal inquiries to [juan.lora@yale.edu](mailto:juan.lora@yale.edu) are welcome.
